### GET A QUOTE ONLINE

As an Eskom Distribution client, unlock even greater benefits. Choose your options below to receive a personalised quote, custom-tailored just for you.

## YOU'RE IN TRUSTED HANDS.

We know how critical it is to find the ideal solar PV solution that fits both your needs and your budget. That's why we offer pre-engineered solar PV kits, designed for quick and effortless installation, giving you a hassle-free experience from start to finish.

Your installer can complete the mandatory SSEG (Small Scale Embedded Generation) registration on your behalf through the Eskom platform. That means less hassle for you.

Our user-friendly quoting tool will help determine which solar or battery solution best suits your needs as well as the costs involved and the potential returns.

## CONTACT

**Our highly skilled, experienced technical support team is available to assist you with your selected system.**
